

## MEDIA PRESS KIT

Manufacturer of these fine brands:

## Our Company

Stephen Davison is the founder and President of Clean Control Corporation. The company, headquartered in Warner Robins GA, manufactures OdoBan®, The Original Odor Eliminator Since 1980, as well as multiple high quality cleaning, deodorizing and

specialty products for families and industry professionals worldwide under the brands OdoBan®, OdoBan® Professional, Earth Choice® and Lethal®.

Clean Control is a small, locally-owned business, employing in excess of 100 employees. The company's various products are distributed through independent retailers, national chains including Sam's Club, Walmart, and The Home Depot as well as online outlets such as Amazon.com, HDSupplySolutions.com, Grainger.com and more.

## Our Story

At the age of twenty-four, Davison started Mobile Wash of America (MWA), a successful government contractor with a focus on cleaning industrial equipment. Escalating chemical costs and the need for superior products led Davison on a mission to develop technologically advanced, cost-effective cleaning solutions. In the spring of 1980, OdoBan® The Original Odor Eliminator, was developed to meet the challenges in nursing homes. In 1980, there were few commercial products available that could get rid of odors from bed pans, soiled bed linen and night gowns. Colostomy bag odors and the 'cancer smell' associated with patient rooms were an entire category all unto themselves. Extensive research on these specific human biological odors would eventually lead to the Lethal® product line (see below).

The unique qualities of OdoBan® - performance, multi-use, environmental safety and signature eucalyptus fragrance - truly became the four cornerstones upon which a new company would be formed. After selling his janitorial business, Davison established Clean Control Corporation, introducing a revolutionary product line evolving from the overwhelming popularity of OdoBan®, Davison's flagship product.

Starting as a small business, the basic corporate philosophy has always been to go one step further. By taking that extra step, Clean Control provides the very best available every time. "We didn't just make a deodorizer we developed an odor eliminator and disinfectant that cleans. We didn't just make something to mop up grease, we developed bacterial solutions that would eliminate grease, which was the basis for our bacterial line," says Davison. It's the extra step that not only keeps customers coming back but also results in customers recommending Clean Control products to their clientele and colleagues.

The OdoBan® brand of products is recognized worldwide as a leading solution for odor elimination and disinfecting. Thus, Clean Control's customer base has grown to serve various market segments which, today, include household consumers as well as wholesale, industrial, hardware, commercial, and institutional customers around the globe. This market diversity is a tremendous testament to the quality and effectiveness of Clean Control's product lines.

The pioneering work done for the nursing home industry that launched OdoBan®, was the catalyst for a patented human scent elimination product that came out in 1995. Originally it was called OdoBan® Outdoor. Made in small hand batches, the popularity grew by word of mouth. Our philosophy was, "We are so good at eliminating odors, we can make you disappear." By 2009, the small hand-made batches had turned into a full production run. OdoBan® Outdoor needed its own identity. In 2010, Clean Control launched the Lethal® ProHunter brand, a product line of human scent elimination products for professional hunters and enthusiasts.

Davison attributes the company's ongoing growth to his Christian beliefs as well as his passion to provide innovative products for the industry. He continues to play an active role in day-to-day operations as well as product sales and marketing for the business. Clean Control's capabilities include manufacturing/shipping, distribution/logistics, marketing and promotional packaging, graphics, POS and display services for all product lines.

## Going Green

Clean Control Corporation research and development has always been built upon the foundation of high performance products that meet customer expectations without harming people, property or the environment through the innovation of processes, products, organization and marketing. Therefore, our team is dedicated to producing effective products using the safest chemicals possible while complying with environmental, safety and health regulations.

### **About Safer Choice**

Clean Control has earned the U.S. Environmental Protection Agency's (EPA) Safer Choice label by meeting the rigorous criteria of the Safer Choice program. EPA scientists work with manufacturers to develop cleaning products with safer ingredients that also meet high performance standards. The Safer Choice label allows consumers, businesses and institutional buyers to quickly identify effective products with ingredients that help protect the environment and are safer for people, pets, workplaces and communities.

In August 2005, Clean Control received recognition from the EPA for their first Green product, later launching the first complete line of Green products to be offered to the public, now known as Earth Choice®.

In November 2008, the EPA recognized Clean Control as a Champion Partner, the highest award offered by the EPA in the Safer Detergent Stewardship Initiative. <http://www.epa.gov/opptintr/dfe/pubs/projects/formulat/formpart.htm>

In February 2012, Clean Control earned the Green Seal certification for 5 of their Earth Choice® products, forming a dual partnership with Safer Choice and Green Seal.

As of 2016, the Safer Choice label can be found on more than 2,000 products including household cleaners, laundry detergents, dishwasher detergents, carpet shampoos, air conditioner coil cleaners and car, RV and boat care products. For a full listing of products, visit [www.epa.gov/saferchoice](http://www.epa.gov/saferchoice).

Clean Control's participation in the EPA's Safer Choice program demonstrates our commitment to making products with ingredients that are safer for our customers and the environment.

## OdoBan® Concentrate Disinfectant / Laundry & Air Freshener

Multi-purpose concentrate; one gallon makes up to 32 gallons. Use as an air freshener, mopping solution, laundry refresher, pet odor eliminator and general purpose cleaner. Eliminates foul odors caused by pets, mildew, smoke, vomit, sewage and urine. Excellent for fire and flood restoration. Kills 99.99% of Germs. EPA Registered.

Available in Original Eucalyptus, Lavender, Citrus, Cucumber Melon\* & Fresh Linen\*

## OdoBan® Ready-to-Use Disinfectant / Fabric & Air Freshener

Multi-purpose convenient ready-to-use. Use as an air freshener, fabric refresher and multi-purpose cleaner. Eliminates foul odors caused by pets, mildew, smoke, vomit, sewage and urine. Kills 99.99% of Germs. EPA Registered.

Available in Original Eucalyptus, Lavender, Citrus, Cucumber Melon\*, Fresh Linen\* & Cotton Breeze\*

## OdoBan® Ready-to-Use Disinfectant / Fabric & Air Freshener

Bag-on-Value (BoV) Continuous Spray Technology sprays 360° and is propelled by pure air. No flammable propellants.

OdoBan® cleans, disinfects, sanitizes and deodorizes all pre-cleaned hard, nonporous household surfaces. Eliminates unpleasant odors on washable surfaces such as upholstery, carpets, bedding, showers, walls and floors while leaving a fresh scent. This industrial liquid odor eliminator leaves no residue and has a variety of uses. EPA Registered.

Available in Original Eucalyptus & Fresh Linen

## What is OdoBan®?

**A DEODORIZER...** eliminates unpleasant odors on washable surfaces such as upholstery, carpets, bedding, showers, walls and floors while leaving a fresh scent.

**A SANITIZER...** kills 99.99% of germs such as <sup>†</sup>*Streptococcus pyogenes* (Strep), *Escherichia coli* 0157:H7 (*E. coli*) (pathogenic strain), *Listeria monocytogenes*, *Staphylococcus aureus* (Staph) and *Klebsiella pneumoniae* on hard, nonporous, nonfood contact surfaces in 60 seconds.

**A DISINFECTANT...** fungicidal against germs <sup>‡</sup>such as *Trichophyton mentagrophytes* (the athlete's foot fungus), when used on surfaces in areas such as locker rooms, dressing rooms, exercise facilities, shower and bath areas.

**A MILDEWSTAT...** effectively controls and inhibits the growth of mold and mildew.

**A VIRUCIDE\***... kills \*HIV-1 (AIDS Virus), Influenza A/Hong Kong and Herpes Simplex type 2 in 60 seconds.

### Sewage Backup, Water Damage, Fire Restoration:

#### Sewage Tanks • Toilets

Spray over affected areas before and after cleaning and extraction. Allow 10 minutes contact time. Use proper ventilation; open windows.

#### Autos: Beverage Spills • Smoking Odors • Musty Carpets

Spray liberally onto seats, carpets, headliner and ashtray or into trunk and all vents to eliminate odors from tobacco, beverage spills and musty carpet.

#### Carpets: Smoke • Mildew

Eliminates odors associated with urine, vomit, smoke and mildew. Reapply after cleaning for freshening effects. Allow to dry.

#### Cleaning Solution: Countertops • Tables • Walls • Bathrooms

Cleans countertops, tables, walls, bathrooms, toilet seats. Also for mopping floors and large routine applications.

#### RV Holding Tanks: Kitchen • Waste Water

**Toilet waste:** Cover bottom of holding tank with water and add OdoBan.

**Kitchen waste:** Add to gray water tank as needed to control malodors created by dirty dishwater.

#### Sanitizer Directions:

Remove heavy soil, then thoroughly clean surfaces. To sanitize, apply to nonfood contact surfaces as required. Let stand 60 seconds then wipe.

#### Disinfection Directions:

Remove heavy soil, then thoroughly clean surfaces. Apply to hard, nonporous surfaces as required. Treated surfaces must remain wet for 10 minutes.

#### Fungicidal Disinfection:

This product is an effective fungicide against *Trichophyton mentagrophytes*. Follow disinfection directions.

#### Mold & Mildew Control:

To control mold and mildew on hard, nonporous surfaces, wash visible soil from the surface. Then apply with mop, sponge, cloth or trigger spray so as to wet all surfaces thoroughly. Let air dry. Repeat application every 7 days to control re-occurrence of growth.

*\*See product labels for complete directions, dilutions, contact times and list of bacteria, fungi and viruses killed.*

EPA Reg. Nos. 66243-1 and 66243-2

## Where can OdoBan® be used?

On walls, tables, floors, chairs, countertops, bathroom fixtures, sinks, shelves, racks, upholstery, drapes, carpets, bedding, shower curtains and mattresses.

### EXCELLENT FOR FIRE RESTORATION.

## How to Use OdoBan®?

#### Air Freshener: Smoke • Cooking • Musty Odors

Effectively neutralizes damp, musty odors caused by mildew in storage areas, basements, closets, bathrooms and

A/C filters. Effective on smoking and cooking odors (garlic, fish, onions).

#### Laundry: Rinse Cycle

Eliminates offensive odors without damaging fibers to control laundry malodors, soften and eliminate static cling without damaging fibers.

#### Pet Odors:

#### Pet Bedding • Litter Boxes • Carpet & Upholstery

For urine, feces and vomit on carpet and upholstery. Clean prior to application then spray onto affected areas. Test hidden areas for colorfastness. Allow 10 minutes contact time. Then blot with clean cloth. Allow to dry. Also effective on pet bedding and litter boxes.

# Green Power EMC Adds 150 kW Solar Facility to Growing Renewable Generation Portfolio

## Middle Georgia Is Home to New Energy Resource

TUCKER, Ga., Feb. 6, 2012 /PRNewswire/ -- Green Power EMC, the largest renewable energy provider in Georgia, continues to grow its energy portfolio with the addition of a 150 kilowatt solar facility in Warner Robins, Ga. The facility will bring Green Power EMC's total renewable generation to almost 28 MW.

(A photo of the facility is available at <http://www.greenpoweremc.com/Files/Clean-Control-Solar-Panels.jpg>.)

Green Power EMC joined forces with odor elimination manufacturer Clean Control Corp. and solar project developer First Century Energy to build the solar project. Located on approximately one acre at the headquarters of Clean Control Corp., the facility will be one of the largest solar photovoltaic arrays in the state, providing 4.7 million kWh of solar energy to the power grid over its projected 25-year lifetime.

"We're very proud to be involved in the Clean Control solar project," said George Mori, executive vice president at First Century Energy. "The array speaks volumes about Clean Control's commitment to sustainability and demonstrates the economic development potential for solar in Georgia, as most of the system components and all labor was sourced in the state."

The Warner Robins project and associated power purchase agreement is the second joint project of First Century and Green Power EMC under a pilot program aimed at deploying solar installations in EMC service areas throughout Georgia.

"Green Power EMC is actively pursuing efficient approaches to increasing the supply of renewable energy to Georgia's EMC members," said Jeff Pratt, president of Green Power EMC. "Distributed solar power generation can help supply a customer's energy needs with little on-going maintenance and no fuel expense."

Currently, approximately 4.4 million EMC-member households across Georgia will have more than 28 thousand kilowatts of renewable energy available to them through Green Power EMC's mix of biomass, solar, and low-impact hydro generation.

### About Green Power EMC

Green Power EMC is a not-for-profit cooperative founded in August 2001 to support EMCs in their search for Georgia renewable resources. The primary efforts of Green Power EMC have been to find, screen, analyze and negotiate power purchase agreements with Georgia-based renewable resource providers. Green Power EMC was the first green power program in the state with green power resources online and operational in October 2003. For more information and a complete list of participating EMCs, visit [www.greenpoweremc.com](http://www.greenpoweremc.com).

### About Clean Control Corporation

Clean Control Corp. is a market-leading manufacturer of cleaning and odor elimination products, such as OdoBan® and Lethal®. Environmental leadership has been a cornerstone principle for Clean Control, as its products are formulated without toxic solvents and fragrances suspected of having adverse environmental effects.

### About First Century Energy

First Century Energy is a leading developer and integrator of solar PV and solar hot water projects for commercial, industrial and government clients. FCE is based in Atlanta and operates through its wholly-owned subsidiaries SolAmerica Energy, LLC and First Century Energy Services, LLC.
